## 36th Annual Scholarship & Research Tournament

By Richard Lombardi

The Scholarship and Research Committee sponsored another successful event with the 36th Annual Scholarship & Research Tournament held at Warwick Country Club on October 1st.

Organizing this event requires dedication and hard work of the committee members and staff early in the year to achieve rewarding results. Recognition goes out to the entire S&R Committee. We would also like to thank the volunteers that helped out on the day of the tournament which are Bill Coulter, Joan Fandetti, John Lombardi, Michelle Maltais, Tom Ohlson, Alicia Pearson, Jim Santoro, Gary Sykes and Mike Varkonyi. The committee also extends a special thank you to Julie Heston for her assistance, dedication and strong administrative support.

To our annual sponsors, who play a key role in the tournament's success, the committee extends its gratitude. Please see the full list of sponsors for this event on the following pages.

Special recognition is also extended to Patrick Meehan and the entire team at Warwick Country Club. The superb conditions of the course and the facility along with excellent service provided by the entire staff from start to finish greatly contributed to the day's success.

In closing, the unconditional support and efforts of all participants will allow the Scholarship & Research Tournament to remain a key event representing the RIGCSA's strong commitment to educational enhancement.

Sincerely,

Richard Lombardi, Chairman

Scholarship and Research Committee

## President's Message

Dear Members,

Well that was quite the summer. I hope everyone is enjoying some of this not cool but cooler weather.

I would like to thank Brooks Pickering from Thorny Lea, Matt Emond from Reservation and Simon Harootian from Meadow Brook for hosting meetings and golf. Each event was a wonderful day of golf and camaraderie. Simon did not let the rain interrupt the championship.

If you find some time as the weather cools down to attend some meetings please do so. The association needs your support to exist into the future. I know we keep saying this but you will get a lot out of talking to your peers and seeing all the wonderful golf courses around Rhode Island and nearby Massachusetts. Also if anyone has an interest in joining the Board of Directors in the future please contact me or someone currently on the board. We need more superintendents to get involved.

And finally, I am looking forward to the fall schedule starting with the Scholarship and Research Tournament being hosted by Patrick Meehan at Warwick Country Club on October 1st. Also the meetings at Newport Country Club and Louisquisset Golf Club are great ways to end the season.

Thank you  
Chris Coen  
RIGCSA President

# THE MATERIAL MATTERS.

## SLATER FARMS

the element in every day  
Recreational - Commercial - Specialty

Slater Farms is the leading provider of high quality sands for the industrial, commercial and filtration markets. We're the element in every day.

[www.slaternaturalfarms.com](http://www.slaternaturalfarms.com) For a project quote, call us at 401-766-5010

 Holliston Sand Company is NSF certified

Proudly supplying our community partners

Sara Tucker recently presented her research work to the RIGCSA members at the November meeting. Sara was the 2017 Dr. Noel Jackson Research Fellowship recipient. Her project title is Bee Forage and Habitat for Rhode Island Golf Courses. She is currently a graduate student at URI working with Dr. Alm in the Entomology Lab.

We have made a pdf copy of the full presentation available to view on our website at [www.rigcsa.org](http://www.rigcsa.org).

## Recommended New England Pollinator Plant List

Adapted for Special Consideration of Golf Courses

Establishing pollinator habitat in out-of-play spaces optimizes the conservation potential of your course, providing a rewarding experience for the environmental steward (you!) and the golfer. This document is meant to provide technical advice for your pollinator garden needs.

*Photo credit: University of Georgia*

### **How to Select Plants for Your Habitat:**

#### **1. Identify the environments where you would like to incorporate pollinator habitat.**

It is necessary that you become familiar with the sun exposure and soil moisture at your potential planting site(s) in order to select plants from this document. Your pollinator habitat does not have to be a very large area, but should be at least large enough to incorporate three different plants per bloom season.

#### **2. Provide year-round forage (at least three plants per bloom season).**

#### **3. Incorporate flowers of multiple colors.**

Some helpful tips on how you can establish a successful pollinator habitat...

- If you are planting from seed, many of the recommended pollinator plants require cold stratification and must be planted in the fall before the last frost. Try broadcast seeding with sand or cat litter to encourage seed-soil contact.
- NEVER apply pesticides to your plants in bloom! Many classes of pesticides are toxic to pollinators. Even drift from nearby pesticide application can be dangerous to pollinators. If nearby application/drift is likely in your space, consider implementing a buffer strip of thick grass along the edge of your pollinator habitat (see Xerces.org for details).
- In the first year of your pollinator habitat, only mow once or twice and at a height of no shorter than 8 inches. In the second year, you can expect to mow more often.

The following is a list of plants we recommend in and around recreational green spaces. All of the listed plants are native to New England and are of high value to a range of pollinators. Remember, your garden should incorporate at least three plants per bloom season.

**Key:** *b = blue/purple flowers w = white flowers y = yellow/orange flowers r = red/pink flowers*

**SURE 'N' TURF**

# NO ONE CAN PUTT WHILE PYTHED.

## Segway® Fungicide SC sinks Pythium disease!

Missing a two-foot putt is maddening, but seeing Pythium destroy healthy turf can drive you over the edge. Stop it with Segway® Fungicide SC.

Segway delivers outstanding protection against Pythium disease, including root dysfunction, blight, damping-off, and root rot. Segway lasts up to 28 days, and has no known cross-resistance with existing fungicides, making it ideal for your rotation program.

We can't help you with your short game, but we can help you stop Pythium: Segway.

► For more information call:  
Bill Affinito at 508.250.3821

[PBIGordonTurf.com](http://PBIGordonTurf.com)

Always read and follow label directions. Segway® is a registered trademark of Ishihara Sangyo Kaisha Ltd. 12/17 05182

*New England's Finest Sod*

PO Box 2 | 264 Exeter Rd  
Slocum, RI 02877

(p) 800-341-6900 | (f) 401-295-0144  
[www.sodco.net](http://www.sodco.net)

*Spectacular Shortcut. Fantastic Fairway Height. Gorgeous Greens Height. Only at Sodco.*

Sodco is currently growing two varieties of **Fairway Height Bentgrass**. **Penway** bentgrass provides the broad genetic diversity that creates a fine texture and the dense, uniform turf. **PureFormance** bentgrass combines the three top performing bentgrass varieties to create optimal playing conditions.

Sodco's **Shortcut Bluegrass** is a mix of Kentucky Bluegrass varieties, maintained at a height of 5/8 inch.

Our shortcut bluegrass is grown with a blend of dwarf bluegrass that is able to handle the low height of cut, which makes this sod perfect for tee boxes and fairways. A perfect substitution for areas bentgrass is not preferred.

Sodco's **007/Declaration Greens Height Bentgrass** far exceeds the overall turf performance that is expected from a traditional bentgrass. This blend combines two top ranked varieties in overall turf quality and dollar spot resistance. Sodco's 50/50 blend is guaranteed to create optimal playing conditions for your greens.

For the longest time newsletters seemed to team with GCSAA government affairs news. With various acts and regulations consistently having an impact on our industry, it seemed all I would write about was legislative gloom and doom. While it may seem the change in administration has magically made the political nightmares disappear, I

assure you that is not the case.

## WOTUS: should I stay, or should I go?

The Waters of the United States 2015 rule set for enactment until a last-minute stay from the Sixth Circuit Court of Appeals is back in the mix. As noted on the GCSAA website Advocacy page:

On Aug. 16, 2018, the U.S. District Court for the District of South Carolina issued a ruling enjoining nationwide the Trump Administration's rule that delayed, until February 2020, implementation of the Obama WOTUS Rule. The district court's decision was based on procedural grounds – the court said the Trump delay rule violated the Administrative Procedure Act (APA) because EPA and the Corps didn't take comment on the substance of the Obama WOTUS Rule or the prior regulations that would stay in place during the delay of the Obama Rule.

The WOTUS 2015 rule is now in effect for 26 states, including every state in the Northeast region, Massachusetts included. There is an appeal pending and an often-updated blog on the Advocacy page expands on these critical updates. More to come as decisions are made.

## EPA: active ingredient registration review

EPA has continued the review of active ingredients currently registered for use within the golf market. I have been tasked with assisting in developing regionally specific information regarding the use of those products by our membership. Several university scientists and members have joined conference calls with the EPA, while others have given comments on use patterns and importance of products to their livelihood. GCSAA's government affairs department and your GA committee have been instrumental in turning this once-contentious regulatory relationship into a sounding board for industry input. Chlorpyrifos has been one such active ingredient in the spotlight. In August, the EPA was mandated by the courts to remove the product from sales in the US. In late September, the Department of Justice called for an appeal of that ruling, a judgment lauded by the USDA. For those battling resistant ABW's, this is a critical tool in the toolbox. Again, look to the Advocacy page for updates as this product soap opera continues.

## Michael Lee wins RISE 2018 Grassroots Excellence Award

GCSAA's Michael Lee, manager, government affairs, earned the 2018 Grassroots Excellence Award from Responsible Industry for A Sound Environment (RISE) at its annual meeting Sept. 25 in Amelia Island, Fla. Lee was honored for his work to engage

GCSAA members in Maryland and Maine in responding to anti-pesticide bills working through state legislatures last spring. Lee's proactive and strategic support and engagement with superintendents on the ground in those states lead to the defeat of the bills as announced by RISE staff at the meeting.

It takes a village to move the needle in the political arena. With strong leadership in GCSAA's government affairs department, an active corps of GCSAA Grassroots Ambassadors (still spots left in Massachusetts & Rhode Island!!), and members participating in local and state initiatives, our industry continues to build momentum. For those who have participated in advocacy, thank you. If you haven't, consider a way to contribute because every voice matters.

## GCSAA Resources and Deadlines you Get Cool Stuff from your Association Already

### GCSAA introduces member savings programs

GCSAA has partnered with Meridian One, which specializes in providing associations, chambers and other member organizations with best in class savings programs to offer their members.

Meridian One's family of affinity programs provide convenient services and valuable discounts to GCSAA members and their families. By leveraging the buying power of GCSAA members, Meridian One can offer programs to help members reduce their business expenses and increase productivity.

Through Meridian One, GCSAA members can receive instant savings on products and services from UPS, the UPS Store, Lenovo, Office Depot, Avis, Budget and Member Freight. [See the full list of savings](#) and learn more.

## Hays

Hays, a leading national insurance and financial services organization, provides a variety of supplemental product and service offerings exclusively to GCSAA members.

## 2019 NERTF Show: Moving Forward with a Different Look!

Since 1998, the New England Regional Turfgrass Conference and Show events have opened on Monday and have concluded on a Thursday. When things first began, we thought a 4-day program was just what the industry was excited for and it was. 15 years later though, communications suggested we could service the industry better by shortening our show schedule. So, this is what we did. In 2016, we decided to compress the schedule by starting at 1pm on Monday, and then end a little earlier on Thursday, which we hoped would make it easier for individuals to come on Monday afternoon and stay till Thursday. This was met favorably but it wasn't long before we heard some of the same concerns and that we should have gone further. Education has always been of the highest priority and what we believe separates us from other shows. A balanced in-depth education program, adequate trade show hours and enjoyable social activities has always been our MO. As we listened to comments and concerns, just three years later, we are informing everyone that it is time to go a little further and do a little more refining of our conference and show schedule.

Below are the highlights of changes to our 2019 show schedule (March 5-7, 2019):

- First, there will be no show activities on Monday, March 4..... Please don't show up on Monday!
- In 2019, all 2 & 4 hr. seminars will be held on Tuesday, March 5 starting at 8am and ending at 5pm. There are no other planned education sessions scheduled on Tuesday.
- Exhibitor Move-In will begin early Tuesday Morning. Exhibitors will be informed as usual.
- Staggered Education Sessions will begin at 8am and 9am on Wednesday for Golf, Sports Turf and Equipment Techs, and again beginning at 1pm.
- The 2019 trade show will open at 10am on Wednesday, March 6 and will close at 5pm.
- The show auction will begin at 4pm and end at 5pm on Wednesday, with the reception to follow.
- Thursday's Education Sessions will begin at 8am for Golf, Sports/Grounds, Lawn Care/Landscape and Equipment Techs. There will be a 2-hour Sports Turf Seminar on Thursday Morning (9-11am)
- The Thursday Trade Show will open at 9am and will close at 2pm
- There will be 2<sup>nd</sup> set of education sessions on Thursday starting at 2pm in the afternoon.
- The show will host an appreciation lunch Thursday on the show floor for all attendees and exhibitors.
- Education hours, trade show hours, credits and social opportunities shall remain the same even with a shortened schedule.

Our goal is to continue to insure the same quality filled event for the future and to attract any and all turfgrass professionals and exhibitors. Today's reality is that with the incorporation of computers, cell phones and texting we are never inaccessible and with our fast-paced lives many responsibilities can't wait. Having more than a three-day and two-night event doesn't fit the schedule for many as easily as it may have in the past. We are confident that through this compacted schedule attendees will receive all the value they have in the past. As has been stated, this show is your show. Your comments and feelings are important in deciding the show's future. We appreciate all your support over the last 22 years, and are at work processing these changes and variables to make the best turfgrass show even better! Want to be a Cut Above the Rest?.... Come to the Greenest Show on Turf! Registration will begin online at [www.nertf.org](http://www.nertf.org) on December 15<sup>th</sup>!

Gary J. Sykes, Executive Director, New England Regional Turfgrass Foundation, Inc.

# Superintendents Needed to Review Best Management Practices

## What is the New England Regional BMP project?

BMP Steering Committees from all seven GCSAA affiliated chapters in New England are coordinating the development of Best Management Practices for golf courses throughout New England. University researchers from UCONN, UMASS, and URI, as well as private consultants and subject matter experts are in the final stages of developing recommendations. The project utilizes the GCSAA BMP Planning Guide and Template and is being funded by the New England Regional Turfgrass Foundation.

The science-based recommendations are being developed by teams of local experts utilizing research from local universities and other existing BMP resources. The goal of the project is to help superintendents plan, record, measure, and promote the work they do to manage their properties in an environmentally and socially responsible manner, and to maximize the benefits golf courses provide their communities. The New England BMP recommendations will serve as the foundation for state and facility level BMP documents in all six New England states.

The success of the project depends on superintendents participating in the process at the facility level, and therefore it is imperative that superintendents participate in the early stages of the development of the recommendations.

## Who should get involved?

The New England BMP Committee is looking for input from superintendents from a variety of courses with respect to **business model, budget, geography, and professional experience**. This includes:

- Superintendents interested in getting involved with their association or giving back to their industry
- Professionals interested in learning new ways to improve their programs, facilities, and operations
- Individuals that would like to take a proactive approach to preserving and protecting the interests of golf courses, and promoting the benefits they offer at the national, state, and local levels.

The goal is to develop recommendations that can be utilized at every golf course throughout the region, which requires input from superintendents from a wide variety of golf courses and backgrounds.

## Why Should You Get Involved?

Golf and other related green industries are coming under increasing scrutiny related to their use of fertilizer, water, and pest control products. As a collection of small businesses that provide numerous economic and

environmental benefits, the industry must work together to educate and inform critics, skeptics, and influential decision makers using science, facts, and metrics to describe the nature, necessity, and impact of our programs. The state BMP's will serve as tools for superintendents to monitor, measure, record, and promote their efforts to improve the maintenance operations at their golf course. They will also serve as an advocacy tool to educate and inform legislators and the public about the efforts of the golf industry to operate in an environmentally and socially responsible manner, and to demonstrate the practices already in place as legislation and regulations are being considered and developed.

### **How can people participate in the project?**

Steering Committees from all six New England states will be recruiting superintendents to review the recommendations from the authors. Reviewers will be selected to review chapters based on their professional background and experience.

- What is the time commitment?
  - 2-4 hours per chapter of the document to read, develop, and submit comments
  - Volunteers will be asked to review only chapters related to their experience or areas of interest
  - The goal is to have one reviewer from each state per BMP chapter, and to include as many volunteers as possible
- What is the timeline?
  - The review process will begin in late 2018 and be completed before the beginning of the 2019 golf season.
- What experience should reviewers have?
  - General golf course operations
  - Water quality or quantity issues (surface water management, irrigation, water quality management)
  - Nutrient restrictions (nutrient management)
  - Sensitive landscape or habitats (Pesticide management, landscape)
  - Recent facility upgrades (operations, energy)
  - IPM requirements
  - Major renovations (Planning, design, and construction)

Reviewers will receive detailed instructions related to the process and nature of feedback that is needed. Interested superintendents should contact representatives from the BMP Steering Committee in their state.

# RIGCSA Member News

## Welcome New Members:

**Ben Petersen**, Affiliate, Tom Irwin, Inc.

**Harris Schnare**, Affiliate, Tom Irwin, Inc.

**Jeffrey Tibbetts**, Superintendent, Quinnotisett CC

Our condolences are extended to **John Streeter** and family on the passing of **Pauline Streeter** who passed away in late October. Many of our members knew Pauline who also worked for CAGCS for over 10 years as the Executive Secretary.

Our condolences go out to **Aaron Maher** and family on the passing of Aaron's grandfather in October.

We send out well wishes for a speedy recovery to **Keith Tortorella** on his recent surgery.

We are looking for meeting hosts for 2019. Please consider hosting a meeting. This is a great opportunity to have the RIGCSA members visit your course. If you are interested in hosting a meeting, please contact an RIGCSA Board Member or **Julie Heston**.

Congratulations to the team of **Matt Crowther** and **Gary Sykes** as the 2018 winners of the Centennial Cup!

Reminder: The RIGCSA scholarship applications are due on December 1st. Please visit [www.rigcsa.org](http://www.rigcsa.org) to print a copy or contact Julie Heston.

If you were unable to attend the S&R Tournament this year and would like to support the Scholarship & Research fund, we have 2 sweaters (comes with thermal undershirt) available for sale. They are both size medium; 1 gray, 1 green. The price is \$80 (retail list price of \$170). Contact Julie Heston if you are interested in purchasing.

Thank you to **Don Carter** who donated his complete winnings from the S&R tournament's 50/50 raffle back to the scholarship & research fund.

Thank you to **Michelle Maltais** for taking all the wonderful photos of the RIGCSA events. You can also view the photos from past events on our website under the "Events" tab at [www.rigcsa.org](http://www.rigcsa.org). You will need to login to view the photos.

# The Next Generation of Surfactants

## You Don't Have to Sacrifice Optimum Soil Moisture to Achieve Firm and Fast Conditions on Top...

### Turf Surfactants with a Difference

The Ocean Organics Surfactant Line provides you with ideal playing conditions and the uniform root zone soil moisture that every plant craves. Our proprietary surfactant formulations contain EO/PO Block technology to cure water repellency, a biostimulant to foster plant fitness, and a specialized penetrant.

Using our high-performance surfactants you can optimize moisture uniformity and increase the efficacy and control of your fertility and pesticide programs while conserving water.
